

KLove serves me as a resident of the community by giving me and my family a choice of quality Christian family music to listen to, news and weather updates and keeps us informed of happenings going on around the local churches in our area. The impact to our community would be dire and drastic if KLove would be displaced by other programming. Freedom of speech should mean freedom of radio programming as well, correct?

KLove programming is in the public interest because it is family friendly. It is free. It is wholesome. It is just plain good. It is a needed station. You can not take a station like KLove off of the air. There is entirely too much junk on the radio and on TV and you are trying to take away one of the one good family friendly wholesome stations, there are left???
